

## THE SHINOLA ON HEALTH CARE REFORM STOPS HERE

I write to call out the health care bill for being a total fraud on the American People.

You say that all that matters is a so-called health care "bill of rights" supposedly enshrined in this new bill, despite the fact that anything that would ensure real fundamental change has been systematically shut out, from a possible Medicare buy-in, to prescription drug re-importation, all the way back to the exclusion of an economical and efficient single payer system from even having a seat at the debate.

This is just as big a lie as the so-called Credit Card Bill of Rights passed in May, which has done nothing to reduce interest rates since. Anyone who thinks there is anything left in the health care bill that drug and insurance companies don't think they can connive their way around is not just a fool, but corrupt and complicit as well.

You say the bill will provide health care to 30 million new people. This too is the most foul of lies. Instead, it will FORCE 30 million people to provide their OWN insurance (or make the rest of us pay for it as taxpayers), at inflated medical corporation rates, with no effective competitive alternative.

And lastly, stop lying to us about how the drug and insurance companies are all so opposed to the bill now, after they got every major thing they wanted literally lock, stock and barrel.

Throw Medicare open to ANY American citizen who wants to buy into it. Anything else masquerading as reform is nothing but thousands of pages of shinola, and you know it.
