

Open The Health Care Conference Committee To Public Scrutiny

I write to protest conducting the business of health care reform like the worst kind of back room deal, now again, in not even allowing a conference committee on the final form of a health care bill. How dare this President, who promised a new openness in government, not only participate in, but even encourage such an outrage to the public interest!

We are frankly not interested in whether the Republicans want to obstruct the process or not. Let the American people SEE that in living color on their CSPAN channel. And let the American people also see who is standing up for real health care reform, and who is just greasing a sweet deal for the medical insurance industry, and a very bad deal for the rest of us.

From the beginning we the people have been completely shut out of the process. The option of Medicare for all, the true economical and efficient solution, was preemptively shut out of the debate by force of police. No matter how many of our emails and faxes you blithely ignore we will never shut up. And in some election in the not too distant future our voices WILL finally count for something.
