

Mr. President, We The People Have A Better Health Care Approach . . . Single Payer

In your State of the Union speech you asked to hear from us. Will you hear us now, for the first time?

There is a reason why the drug and insurance companies fought so hard to keep single payer health care, like a Medicare for All system, from even being considered as an option. It is precisely because they know it is the only thing that will reduce their outrageous profits. In other words, this proves THEY know it is the only thing that will actually work, to reduce health care costs for the American people and our government treasury.

If corporate insurance companies, with their ridiculously high overhead, can stay in business charging the premiums they do, then why cannot the existing economical and efficient Medicare system take in more people at more reasonable rates, and remain solvent until the end of time? The logic is inescapable to anyone even willing to CONSIDER good public policy.

We the people demand: 1) open up the Medicare system to ANY American citizen who wants to buy into it, 2) eliminate the ERISA loophole (Kucinich amendment) that makes it more difficult for states to create their own single payer systems, if that is what they want, and 3) ban the various insurance company bad faith denial of coverage dodges.
